Forecast for Wednesday 21 Jul 2021

Weather: Dry and warm to start with clear skies. Temperatures rising quickly, making it feel hot by the afternoon, especially on south facing slopes. Some cumulus cloud bubbling up by the afternoon but staying above the summits. Remaining dry and clear into the evening and overnight period.

Chance of cloud free mountain/hill tops above 800m: 100%

Visibility: Very good with distant hills and landmarks easily visible from summits. A slight heat haze during the afternoon, with this reducing the air clarity a little.

Freezing Level*	2900m	2900m	2800m	2800m	2800m	2800m	2700m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Another very warm day with very high UV levels which will give a high risk of sunburn, and the hot conditions will give a risk of dehydration and heat exhaustion. Remember sun protection and plenty of water if you are heading into the mountains.

Forecast for Thursday 22 Jul 2021

Weather: Dry and sunny during the morning and quickly becoming very warm or hot once again. Becoming a little hazy with some cloud bubbling up during the afternoon. Small risk of an isolated shower developing during the day, but most likely remaining dry.

Maximum wind: Variable or south-easterly 10-15 mph

Chance of cloud free mountain/hill tops above 800m: 100%

Visibility: Generally very good with distant hills and summits visible. A slight heat haze during the afternoon, with this reducing the air clarity a little.

Temperature: **Valleys:** Plus 13 Celsius rising to plus 25 Celsius.
At 800m: Plus 17 Celsius rising to plus 21 Celsius.
Freezing level: Well above the summits.

Sunday	Generally unsettled and cloudy with scattered showers, some locally heavy and thundery. Moderate north to northwest winds on the hills.
